Are you tired of writing repetitive and fragile test scripts that break with every minor change in your application? Do you want to create robust and maintainable test frameworks that can handle the ever-changing landscape of software development? If so, then this book is for you.

In this comprehensive guide, you will learn the art of building data driven test frameworks using Selenium WebDriver, AppiumDriver, and Java. We will cover everything from the basics of Selenium and Appium to advanced topics such as parallel testing, cross-browser testing, and mobile testing.

By the end of this book, you will be able to:

- Build scalable and maintainable test frameworks using Selenium WebDriver and AppiumDriver
- Use data driven testing techniques to improve the efficiency and reliability of your tests
- Perform cross-browser testing to ensure that your application works across all major browsers
- Execute parallel tests to reduce the time it takes to run your test suite
- Test mobile applications using AppiumDriver

This book is written for software testers, developers, and architects who want to improve the quality and efficiency of their testing efforts. No prior experience with Selenium or Appium is required.

Table of Contents

- 1.
2. Getting Started with Selenium WebDriver
3. Getting Started with AppiumDriver
4. Data Driven Testing with Selenium and Appium
5. Cross-Browser Testing with Selenium
6. Parallel Testing with Selenium
7. Mobile Testing with Appium
8. Advanced Topics
- 9.

About the Author

John Smith is a software testing expert with over 10 years of experience. He has worked on a wide variety of projects, from small startups to large enterprises. John is a passionate advocate for data driven testing and has helped many teams to improve the quality and efficiency of their testing efforts.
